

# Cables

## Red Series

Technically superior Acurus cables ensure that your installation has the same rugged, premium quality as your components. Don't risk your installation by using ordinary interconnect cables.

RED SERIES cable highlights:

- available in both XLR and RCA endpoints
- custom designed exclusively for Acurus products
- assembled with professional-grade Belden™ wire
- made in the USA
- LIFETIME warranty

To ensure the very best audio connection between our processors and amplifiers, Acurus offers two custom-made cables:

**TETRA** – The DB9 to 4-channel output adapter cable, called the TETRA, is a must if the maximum channel count is desired for the Acurus ACT 4 or MUSE immersive processors.

**MONO** – For single output channels, the Acurus MONO cable is the best choice.

Both MONO XLR-XLR and MONO XLR-RCA are available in .5m, 1m, 2m, 3m lengths. Custom lengths and cable bundles are also available.

TETRA XLR and TETRA RCA cables are included with ACT 4 and MUSE processors. *(Please specify when ordering.)*
